

RENAD ABU SHARIT

Computer Science and Engineering |Software engineer | Data Analyst |

• 0501334819 • Renadeid624@gmail.com • Jubail, SA

SUMMARY

Computer Science and Engineering graduate from The University of Toledo with experience in software engineering, data analytics, and full-stack web application development. Developed an EV Rental Management System using JavaScript, Node.js, and PostgreSQL as part of a senior engineering capstone project. Certified in artificial intelligence, cybersecurity, and data fundamentals, with strong analytical, communication, and problem-solving skills.

EDUCATION

Bachelor of Science in Computer Science and Engineering

May 2026

- The University of Toledo — Toledo, OH

WORK EXPERIENCE

Peer Mentor — Embedded Systems Course

August 2025 – January 2026

The University of Toledo

- Assisted students with embedded systems concepts, programming logic, and debugging assignments.
- Supported classroom engagement and technical problem-solving during labs and coursework.
- Guided students in understanding course material and applying engineering concepts in practical assignments.

Engineering Workshop Participant

August 2025

Dana Incorporated

- Participated in engineering workshops focused on industrial technologies and engineering operations.
- Gained exposure to manufacturing systems, technical workflows, and collaborative engineering practices.
- Developed a stronger understanding of industry practices within a professional engineering environment.

Data Analyst (3 co-op rotations)

May 2021-May 2023

COATECH Company — Jubail Industrial City, Saudi Arabia

- Supported the Operations and Accounting Department through data analysis and reporting activities.
- Assisted in computational modeling and data analytics projects to support business decision-making.
- Generated reports and analyzed operational data to identify trends and improve efficiency.
- Collaborated with team members to implement and utilize new software solutions.
- Trained and supported employees in adopting state-of-the-art software tools and workflows.
- Worked remotely in a professional 40-hour-per-week environment while managing multiple project tasks.

ACADEMIC PROJECT

EV Car Rental Management System — Senior Design Project

- Developed a full-stack EV rental management platform to monitor vehicle status, charging activity, rentals, and billing.
- Built backend services and RESTful APIs using Node.js and PostgreSQL.
- Designed dashboard interfaces and invoice-generation feature to support rental tracking and administrative workflows.
- Implemented simulated real-time EV charging and monitoring functionality.
- Collaborated with a software engineering team using modular development practices.

CERTIFICATIONS

- Artificial Intelligence Concepts & Advanced Applications — SDAIA
- Fundamentals of Artificial Intelligence — SDAIA
- IBM Data Fundamentals
- Introduction to Artificial Intelligence with Python (Harvard/edX)
- Introduction to Cybersecurity (Harvard/edX)
